

For the purposes of presentation, non-detects are plotted at 1 s/cm²
Restricted to dust samples from areas representative of living areas (i.e., shed, garage samples, etc. are excluded)

N = 72 dust samples > 5000
N = 288 dust samples > 1000

For OU4 Properties with Dust Field Samples in Living Space/Freq Use Areas

1,427 = N properties with TEM results for dust field samples
